PartLink

We got you

User Stories and Tasks

Project Presentation 3 | Agile Portfolio | Khayelitsha, Cape Town

1. Purpose

PartLink is a mobile-first digital marketplace that connects vehicle owners, mechanics and small transport operators in Khayelitsha with verified car part sellers. Our community survey (21 responses) found long travel times and distances to get parts, unreliable local stock, and a strong willingness to pay for convenience (90% of respondents). These user stories turn that research and our business idea into work the team can plan, build and test. Each story follows the format **As a [user], I want to [goal], so that [benefit]** and is broken into tasks.

2. Who we are building for

User	What they need from PartLink
Car owner	Find the correct, affordable part without visiting several shops or paying dealership prices.
Mechanic	Get urgent parts quickly to finish repairs and keep customers.
Small transport business owner	Get a taxi, e-hailing or delivery vehicle back on the road so income is not lost.
Seller (mechanic, scrap yard, individual)	Reach more buyers without a physical store or expensive marketing.
Car enthusiast	Find rare or specific parts and compare options in one place.
Administrator	Verify sellers so buyers can trust the platform.

Car users who depend on someone else's vehicle benefit indirectly, when repairs are faster.

3. How stories are prioritised and finished

Priorities use the MoSCoW method: **Must** (11 stories) are needed for a working PartLink, **Should** (8) add important value, and **Could** (3) are optional. A story is done when it meets our team's Definition of Done: work aligned with project requirements, documentation completed and reviewed, tasks updated in the Agile logbook, deliverables meeting quality standards, and team agreement that the objectives are achieved.

4. Story overview

ID	Story	Priority	Screens
US-01	Register an account	Must	Registration
US-02	Log in and out securely	Must	Login
US-03	Reset a forgotten password	Should	Reset Password
US-04	Manage my profile and settings	Should	Profile, Settings
US-05	Understand PartLink and contact the team	Should	Landing, About Us, Contact Us
US-06	List a car part	Must	Listing, Edit Listing
US-07	Manage my listings	Must	View Listing, Edit Listing
US-08	Search for a part	Must	Home / Products
US-09	Filter results	Must	Home / Products
US-10	See full part details	Must	Car Part Details
US-11	Compare prices	Should	Home / Products

ID	Story	Priority	Screens
US-12	Use a shopping cart	Must	Cart
US-13	Pay securely at checkout	Must	Checkout
US-14	Find parts near me	Should	Home / Products
US-15	Get a vehicle back on the road quickly	Should	Home / Products
US-16	Get notified about parts I want	Could	Notifications
US-17	Request a part I cannot find	Could	Requests, Create Car Part Request
US-18	Message a seller	Should	Car Part Details
US-19	See which sellers are verified	Must	Car Part Details, Profile
US-20	Verify sellers	Must	Admin
US-21	Rate and review sellers	Should	Car Part Details
US-22	Report a suspicious listing	Could	Car Part Details

5. User stories in detail

A. Accounts and profile

US-01 Register an account — Must

As a buyer or seller, **I want to** create an account with my details, **so that** I can use PartLink to buy or sell car parts.

ACCEPTANCE CRITERIA
- Registration asks for name, contact details, password and whether I am a buyer or seller
- An existing email or phone number is rejected with a clear message
- A confirmation is shown after successful sign-up

TASKS
- Build the Registration screen in React
- Add form validation
- Create the user table and register endpoint (Java, MySQL)

Screens: Registration | **Source:** Taskboard / wireframes

US-02 Log in and out securely — Must

As a registered user, **I want to** log in securely, **so that** my listings, cart and messages stay private to me.

ACCEPTANCE CRITERIA
- Valid credentials take me to the Home screen
- Invalid credentials show an error without revealing which field was wrong
- Logging out ends my session

TASKS
- Build the Login screen
- Authenticate against the Java API
- Handle session and log out

Screens: Login | **Source:** Taskboard / wireframes

US-03 Reset a forgotten password — Should

As a user who forgot my password, **I want to** reset it, **so that** I can get back into my account.

ACCEPTANCE CRITERIA
- A reset link or code is sent to my registered contact
- The new password must meet the password rules
- The old password stops working after a reset

TASKS
- Build the Reset Password screen
- Create the reset-token endpoint
- Show a confirmation message

Screens: Reset Password | **Source:** Taskboard / wireframes

US-04 Manage my profile and settings — Should

As a user, **I want to** view and update my profile and settings, **so that** my details and preferences stay correct.

ACCEPTANCE CRITERIA
- I can edit my name, contact details and location
- Changes are saved and shown immediately
- Sellers can see their verification status on their profile

TASKS
- Build the Profile and Settings screens
- Create the update-profile endpoint
- Test saving and displaying changes

Screens: Profile, Settings | **Source:** Taskboard / wireframes

B. Discovering PartLink

US-05 Understand PartLink and contact the team — Should

As a first-time visitor, **I want to** see what PartLink does and how to contact the team, **so that** I can decide whether to trust it and join.

ACCEPTANCE CRITERIA

- The Landing page explains buying and selling in a few lines, with a sign-up call to action
- About Us explains the mission and how sellers are verified
- Contact Us lets me send a message or shows the team's contact details

TASKS

- Build the Landing, About Us and Contact Us screens
- Apply the PartLink colours, logo and typography
- Write the page content

Screens: Landing, About Us, Contact Us | **Source:** Business idea

C. Seller listings

US-06 List a car part — Must

As a seller, **I want to** list my car parts with photos, condition and price, **so that** buyers can trust what they are buying.

ACCEPTANCE CRITERIA

- A listing needs a part name, car brand and model, condition (new or used), price, location and at least one photo
- The listing appears in search once saved
- I see a confirmation after publishing

TASKS

- Build the listing form in React
- Add photo upload
- Save listings through the Java API to MySQL

Screens: Listing, Edit Listing | **Source:** Taskboard / business idea

US-07 Manage my listings — Must

As a seller, **I want to** view, edit and remove my listings, **so that** my stock and prices stay accurate and buyers are not misled.

ACCEPTANCE CRITERIA

- I can see all of my own listings in one place
- Editing updates the price, condition and photos
- Sold or removed parts no longer appear in search

TASKS

- Build the View Listing and Edit Listing screens
- Create the update and delete endpoints
- Test that removed listings leave search results

Screens: View Listing, Edit Listing | **Source:** Taskboard

D. Finding and buying parts

US-08 Search for a part — Must

As a buyer, **I want to** search by part name, car model or brand, **so that** I find the exact part for my vehicle.

ACCEPTANCE CRITERIA
- Results show the part, price, condition and location
- When nothing matches, I see a message that suggests requesting the part
- Results appear after I submit my search

TASKS
- Add a search bar to the Home / Products screen
- Create the search endpoint
- Build the results cards

Screens: Home / Products | **Source:** Business idea

US-09 Filter results — Must

As a buyer, **I want to** filter car parts by brand, model and price, **so that** I can quickly find what I need.

ACCEPTANCE CRITERIA
- Brand, model and price filters can be combined
- I can set a minimum and maximum price
- A clear-all option resets the filters

TASKS
- Build the filter controls
- Pass filters to the search endpoint
- Test filter combinations

Screens: Home / Products | **Source:** Taskboard

US-10 See full part details — Must

As a buyer, **I want to** see the full details of a part, including photos, condition, price and seller, **so that** I can decide before I commit to buying.

ACCEPTANCE CRITERIA
- Details show photos, description, brand, model, condition, price and location
- The seller's name, verification status and rating are shown
- I can add the part to my cart or contact the seller from this screen

TASKS
- Build the Car Part Details screen
- Create the get-listing endpoint
- Add the cart and contact actions

Screens: Car Part Details | **Source:** Business idea

US-11 Compare prices — Should

As a car owner, **I want to** compare prices for the same part from different sellers, **so that** I avoid overpaying without visiting multiple shops.

ACCEPTANCE CRITERIA
- Results can be sorted by price
- Listings for the same part from different sellers can be seen together
- Each seller's location is visible

TASKS
- Add a sort control
- Standardise part naming so similar parts group together
- Test price ordering

Screens: Home / Products | **Source:** Business idea / survey

US-12 Use a shopping cart — Must

As a buyer, **I want to** add parts to a cart and review them, **so that** I can check my order before paying.

ACCEPTANCE CRITERIA
- I can add and remove items
- A running total is shown
- My cart is kept while I am logged in

TASKS
- Build the Cart screen
- Create the cart endpoints
- Calculate totals

Screens: Cart | **Source:** Taskboard / wireframes

US-13 Pay securely at checkout — Must

As a buyer, **I want to** pay through the app, **so that** I am protected from unsafe transactions.

ACCEPTANCE CRITERIA
- The order summary, collection or delivery choice and payment details are shown before I confirm
- A confirmation is shown after payment
- The transaction is recorded so PartLink's commission can be calculated

TASKS
- Build the Checkout screen
- Integrate a payment service (test mode first)
- Save the order and calculate the commission

Screens: Checkout | **Source:** Business idea

E. Needs of specific users

US-14 Find parts near me — Should

As a mechanic, **I want to** see which parts are available near me, **so that** I can finish repairs on time and keep my customers.

ACCEPTANCE CRITERIA
- I can filter or sort listings by location or distance
- Each listing shows its availability status
- I can contact the seller directly

TASKS
- Add the location field to listings
- Build the location filter and sort
- Test with listings from different areas

Screens: Home / Products | **Source:** Survey

US-15 Get a vehicle back on the road quickly — Should

As a taxi or delivery operator, **I want to** find an in-stock part fast, **so that** my vehicle spends less time off the road earning nothing.

ACCEPTANCE CRITERIA
- I can show only parts that are in stock
- Listings show when they were last updated
- I can message the seller straight away

TASKS
- Add an in-stock flag to listings
- Build the in-stock filter
- Show the last-updated time

Screens: Home / Products | **Source:** Survey

US-16 Get notified about parts I want — Could

As a car enthusiast, **I want to** be notified when a rare or specific part is listed, **so that** I do not have to keep checking the app.

ACCEPTANCE CRITERIA
- I can save a part search as an alert
- I am notified when a matching part is listed
- I can switch alerts off in Settings

TASKS
- Create the saved-search table
- Build the notification trigger
- Add the alert controls to Settings

Screens: Notifications | **Source:** Business idea

US-17 Request a part I cannot find — Could

As a buyer who cannot find a part, **I want to** post a request for it, **so that** sellers can contact me when they have it.

ACCEPTANCE CRITERIA
- I can describe the part, car brand and model, and my budget
- Sellers can see open requests
- I can close a request once I have found the part

TASKS
- Build the Requests and Create Car Part Request screens
- Create the request endpoints
- Show matching requests to sellers

Screens: Requests, Create Car Part Request | **Source:** Taskboard (optional screens)

F. Trust and safety

US-18 Message a seller — Should

As a buyer, **I want to** message sellers inside the app, **so that** I can check fit and condition before buying.

ACCEPTANCE CRITERIA
- I can send a message from the part details screen
- The seller can reply and I can see the conversation
- Messages stay inside the app

TASKS
- Design the messages table
- Build the chat screen
- Create the send and receive endpoints

Screens: Car Part Details | **Source:** Business idea

US-19 See which sellers are verified — Must

As a buyer, **I want to** see which sellers are verified, **so that** I avoid scams, low-quality parts and stolen parts.

ACCEPTANCE CRITERIA
- A verified badge shows on listings and seller profiles
- Unverified sellers are clearly labelled
- The verification criteria are explained on the About Us page

TASKS
- Add a verified flag to the seller record
- Build the badge component
- Show the badge on details and profile screens

Screens: Car Part Details, Profile | **Source:** Business idea

US-20 Verify sellers — Must

As a administrator, **I want to** review and approve seller verification requests, **so that** only legitimate sellers carry the verified badge.

ACCEPTANCE CRITERIA

- I can see a list of pending requests
- I can approve or reject a request with a reason
- The seller is told the outcome

TASKS

- Build the admin review screen
- Create the approve and reject endpoints
- Send the outcome notification

Screens: Admin | **Source:** Business idea

US-21 Rate and review sellers — Should

As a buyer, **I want to** rate and review a seller after a purchase, **so that** other buyers can trust good sellers.

ACCEPTANCE CRITERIA

- Only buyers with a completed order can review
- The average rating is shown on listings and profiles
- Reviews are visible on the part details screen

TASKS

- Add the reviews table
- Build the review form
- Calculate and display the average rating

Screens: Car Part Details | **Source:** Business idea

US-22 Report a suspicious listing — Could

As a user, **I want to** report a suspicious listing, **so that** stolen or fake parts are removed.

ACCEPTANCE CRITERIA

- Every listing has a report option with a reason
- Reports reach the administrator
- The reporter is thanked for reporting

TASKS

- Add the report button and form
- Create the reports table and endpoint
- Show reports on the admin screen

Screens: Car Part Details | **Source:** Survey / problem statement
